1720 South Red Hills Drive, Richfield, Utah 84701

diamondkgypsum.com

HIGHLY SOLUBLE - Apply in season to boost nutrient levels quickly.

READILY AVAILABLE - Water soluble, nitrogen and calcium source that plants can immediately take up to improve cell strength and shelf life.

APPLIED FOLIAR OR FERTIGATE - Apply directly to plants to improve nutrient utilization at key points during the growing cycle.

CONTAINS AMINO ACIDS - Amino acids have high carbon/nitrogen ratio to feed plant and micro-organisms.

NON-GMO SOY PROTEIN - formulated using all-natural soy protein 7/11 is approved for organic use.

TECHNICAL DATA

7/11
7-0-0-11Ca

Guaranteed Analysis

Total Nitrogen (N)	7%
7% water soluble nitrogen	
Calcium (Ca)	11%

Available in 40 lbs bags and 2000 lbs totes

Chemical Composition

Derived from soy protein hydrolysate and calcium sulfate dihydrate.

Information regarding the contents and levels of metals in the product is available on the internet at <http://www.aapfco.org/metals.html>

Always use a jar test for compatibility before mixing.

Store in a cool dry place away from excessive moisture and heat.

Directions for Use: Apply 3-9 lbs per acre when plants are actively growing or as needed based on your nutrient management program determined from soil and plant analysis for your crop.
