MAINTENANCE FREE - With only one moving part, Diamond K's applicators are virtually maintenance-free. Using water pressure alone, our applicator needs no agitation. The patented wobbler is a rotary action sprinkling device used to generate a slight vibration to disperse water upon the dry product.

EASY TO USE - Easy to read metering gauge permits accurate injection of fertigation into irrigation water. Application is constant throughout the irrigated areas, with no fluctuation in concentration. Soil and water analysis determines the required application rate for maximum crop benefit.

BEST ON THE MARKET - Designed specifically for turning Diamond K quality fertilizer products into solution. Works seamlessly with Diamond K Premium 97 Gypsum, Ultra Fines Sulfate of Potash, KMS, and other products.

A SIZE TO FIT EVERY NEED - Our revolutionary applicator is available in 3 sizes: 1200 lb./175 gallons; 2000 lb./325 gallons or 4000 lb./525 gallons.

AT A PRICE THAT MAKES SENSE - At less than half the cost of other solution applicators on the market, our patented applicator makes fertigation a breeze.

TECHNICAL DATA

Diamond K Applicators

All Diamond K Applicators can be loaded with the following methods:

- Hand Loading using 50 lbs bags
- Bulk Silo with metered or manual auger
- Tote bags via Forklift
- Tender cart
