SECTION 3 – COMPOSITION/INFORMATION ON INGREDIENTS

Substance/Mixture: Mixture

Ingredients

Chemical Name	CAS-No.	Typical composition (%)
Calcium Sulfate Dihydrate (alternative CAS 10101-41-4)	13397-24-5	85-95%
Proprietary Binder		2-6%

Raw materials in this product contain respirable crystalline silica as an impurity. The weight percent of respirable crystalline silica found in this product is < 0.1%. Exposures to respirable crystalline silica during the normal use of this product should be determined by workplace hygiene testing.

SECTION 4 – FIRST AID MEASURES

If inhaled: Dust may irritate the nose, throat, and respiratory tract by mechanical abrasion. Coughing, sneezing, and shortness of breath may occur following exposures in excess of appropriate exposure limits. Move to fresh air in case of accidental inhalation of dust. If symptoms persist, call a physician.

In case of skin contact: Direct contact may cause irritation by mechanical abrasion. Wash off with soap and plenty of water.

In case of eye contact: Direct contact with dust may cause irritation by mechanical abrasion. Do not rub eye. Flush eye thoroughly with water. Keep eye wide open while rinsing. Remove contact lenses. If irritation occurs, get medical assistance.

If swallowed: Intestinal obstruction may occur if the material hardens, especially in the pyloric region. Rinse mouth thoroughly with water and drink afterwards plenty of water to dilute material in stomach. Do not induce vomiting. Never give anything by mouth to an unconscious person.

SECTION 5 – FIRE FIGHTING MEASURES

Flash Point: Non-Flammable

Suitable extinguishing media: This material is not combustible. Appropriate extinguishing media for surrounding fire should be used.

Hazardous combustion products: None. Above 1450°C, material can decompose and release sulfur dioxide (SO₂) and oxides of carbon.

Special protective equipment for fire fighters: In the event of fire, wear self-contained breathing apparatus.

SECTION 6 – ACCIDENTAL RELEASE MEASURES

Steps to be taken in case material is released or spilled: Use dry methods to collect spilled materials, and reuse clean materials. Avoid generating dust. Do not clean up with compressed air. Minimize dust exposure by evacuating area downwind in the case of large spills. Store contaminated materials in dry, sealed plastic or non-aluminum metal containers. Residues on surfaces may be washed with water.

Environmental precautions: No special environmental precautions required.
