GUARANTEED ANALYSIS

Calcium Sulfate Dihydrate $CaSO_4$-$2H_20$……92.0%
Calcium (Ca)……..21.0%
Sulfur (S)……..17.0%
Derived From: Mined Gypsum

GENERAL INFORMATION:
Diamond K Premium Prill Gypsum is prilled gypsum for use in bulk dry blends, row/side banding, and broadcast spreading. The prilled material flows easily through equipment, produces less dust than finely ground powders and reduces caking in bags, hoppers and spreaders.

APPLICATION RATE FOR ALL CROPS
Apply Diamond K Prill Gypsum at 100-500lb per acre per year. Consult your crop advisor prior to applications based on current soil sampling results.

COMPATIBILITY:
Jar test for compatibility prior to mixing with any pesticides, fertilizers or fertilizer blends. For unfamiliar mixes, an appropriate amount of the final mix should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. The user assumes full responsibility to ensure product, equipment and plant compatibilities.

STORAGE AND HANDLING:
Prevent exposure to moisture.

This product is not considered hazardous under the U.S. OSHA 29 CFR 1910.1200 Hazard Communication Standard.

NOTICE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. Buyer shall assume all risks of use including, but not limited to crop injury, ineffectiveness or other unintended consequences as may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of the seller. In no case shall Diamond K Gypsum, Inc. be liable for consequential, special, or indirect damages resulting from the use or handling of this product. Always refer to the label on the product before use.
